ALL NEW with this edition of EEM **GET ORGANIZED!**

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M"

for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for \$25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add \$2.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 Stewart Ave., Garden City, NY 11530

INTRODUCTION TO MICROPROCESSORS

This section begins with a Master Selection Guide that covers all major parameters needed to choose a microprocessor for a particular application. Microprocessors are sequenced by increasing data word size and then alphabetically by manufacturer.

Once you've chosen the proper microprocessor for your application, go to the System Components section. These are arranged alphanumerically by microprocessor, and shows all of the available peripheral devices that work with a particular microprocessor.

Finally, there is a General Purpose section describing devices that can be used in many different microprocessor systems, not just in certain families.

MICROPROCESSORS

General				Architecture									Hardware Support	
Data Word Size (bits)	Process Type	Supply Voltage (V)	No. of Pins	Instruction Word Size (bits)	Directly Addressable Memory (words)	No. of Basic Instructions	(For Microcomputers Only)			Maximum Clock Frequency (MHz)	Instruction Time Min/Max (μs)	No. of Interrupt Levels	Proto-typing System	In-Circuit Emulator

x		x	x	x		32 I/O Lines, power-on-reset, on-chip LCD drive	LCD-III	Hitachi	
x		x	x	x		32 I/O Lines, power-on-reset, on-chip LCD drive	LCD-IV	Hitachi	20
x		x	x	x		Same as COP2440 except no on chip ROM and faster execution time (4μs). Interfaces with MM2716 EPROM. COP2304 is extended temperature range device.	COP2404	National	
x		x	x	x		Romless microcontroller, emulated COP410L/COP411L, interfaces with external memory, will accept MM2716, NM27C16, MM2758A, MM2758B 1K byte accessories.	COP401L	National	
x		x	x	x		Same as COP401L except emulates COP413L with selected RC oscillator option.	COP401L-R13	National	
x		x	x	x		Same as COP401L except emulates COP413L with selected RC oscillator option.	COP401L-X13	National	
x		x	x	x	Western Digital	Has piggyback EPROM socket. Will accept: MM2716, NM27C16, MM2758A, MM2758B. 1K byte accessible.	COP402	National	25
x		x	x	x	Western Digital	Has piggyback EPROM socket. Will accept: MM2716, NM27C16, MM2758A, MM2758B. 1K byte accessible.	COP402M	National	
x		x	x	x	Western Digital	Has piggyback EPROM socket. Will accept MM2716, 2758A, 2758B or NM27C16 EPROM. 2K Byte accessible. Open drain memory interface drivers.	COP404LP	National	
x		x	x	x	Western Digital	Same as COP404LP except push pull memory interface drivers.	COP404LS	National	
x		x	x	x		4μs instruction cycle time, 20 I/O lines, 2 level subroutine stack, COP310C operates extended temperature range, COP210C operates full temperature range.	COP410C	National	
x		x	x	x	Eurotechnique, Western Digital	16 I/O lines, 24 pins, COP310L has extended temperature range (-40°C to -85°C).	COP410L	National	30
x		x	x	x		4μs instruction cycle time, 16 I/O lines, 2 level subroutine stack, COP311C operates extended temperature range, COP211C operates full temperature range.	COP411C	National	
x		x	x	x	Eurotechnique, Western Digital	13 I/O lines, 20 pins, COP311L has extended temperature range (-40°C to -85°C).	COP411L	National	
x		x	x	x		16 I/O lines, 20 pins COP313C has extended temperature range (-40°C to 85°C)	COP413C	National	
x		x	x	x		16 I/O lines, 20 pins COP313CH has extended temperature range.	COP413CH	National	
x		x	x	x		15 I/O lines, 20 pins, COP313L has extended temperature range.	COP413L	National	35
x		x	x	x			COP414L	National	
x		x	x	x	Eurotechnique, Western Digital	COP32X is extended temperature range version. Also available in smaller packages: COP421 series-24 pins, COP422 series-20 pins.	COP420	National	
x		x	x	x	Eurotechnique, Western Digital	Same as COP420 except 23 I/O lines.	COP420L	National	
x		x	x	x		Basically the same as COP420 except piggyback microcontroller. CPU, RAM, I/O and EPROM socket. Accepts: MM2716, NMC27C16, MM2758A, MM2758B. 1K byte accessible.	COP420R	National

x		x	x	x	RCA	Single chip CPU and I/O, up to 8K external address space, 16 programmable bidirectional I/O lines, multiplexed bus.	MC146805E2	Motorola	
x		x	x	x	RCA	20 I/O (16 programmable bidirectional) self check mode, EPROM version available.	MC146805F2	Motorola	
x		x	x	x	RCA	32 programmable bidirectional I/O lines. Self check mode, EPROM version available.	MC146805G2	Motorola	20
x		x	x	x		Self check, frequency synthesis, audio tone output, dead man timer.	MC146805H2	Motorola	
x		x	x	x		EPROM version of 146805F2	MC1468705F2	Motorola	
x		x	x	x		32 programmable bidirectional I/O lines, bootstrap, EPROM version of 146805F2.	MC1468705G2	Motorola	
x			x			Recommended replacement MC6805XX.	MC3870	Motorola	
x	x	x	x	x		1.5 MHz version of MC6803	MC68A03	Motorola	25
x	x	x	x	x		Serial I/O, timer, expansion bus.	MC68B03	Motorola	
x		x	x	x		Single chip CPU, SCI SPI, 16-bit timer	MC68HC05C4	Motorola (2930)	
						68HC054C4 with 8K bytes of ROM	MC68HC05C8	Motorola	
x	x	x	x	x		8-bit Microcomputer with Liquid Crystal Driver Circuitry	MC68HC05L6	Motorola	
x	x	x	x	x		512 bytes EEPROM, 2 serial ports, 16-bit timer, pulse accumulator, 8-channel A/D	MC68HC11	Motorola (4859)	30
x	x	x	x	x		2 Kbytes of EEPROM, enhanced 16-bit timer system, eight-channel 8-bit A/D converter	MC68HC81A2	Motorola	
x	x		x			DMA through HALT and three state control, addressing modes.	MC6800	Motorola (2931)	
						MC68008 completely code compatible with MC68000. 32 bit internal architecture, general purpose machine.	MC68008	Motorola (4859, 2924)	
x	x	x	x	x	AMI, Hitachi, Fujitsu	On-chip clock, 16-bit timer 31 I/O lines, serial I/O, four selectable baud rates.	MC6801	Motorola (4859)	
x	x	x	x	x		Same as 6801 with 4K ROM and selectable baud rates.	MC6801U4	Motorola	35
x	x	x	x	x		Same as 6801-U4 with 1.25 MHz internal speed.	MC6801U4-1	Motorola	
x	x	x	x	x		6800 CPU plus clock and RAM, 32 bytes standby RAM.	MC6802	Motorola (2931)	
x	x	x	x	x		Expansion bus, ROMless 6801.	MC6803	Motorola (4859)	
x	x	x	x	x		Serial I/O, timer, external clock, standby RAM.	MC6803E	Motorola (4859)	
x	x	x	x	x		ROMless 6801u4, external bus.	MC6803U4	Motorola	
x		x	x	x		20-pin version of MC6804P2, 12 I/O, 512 byte ROM.	MC6804J1	Motorola	
x		x	x	x		20-pin version of 6804P2, 12 I/O, 1K byte ROM.	MC6804J2	Motorola

MICROPROCESSOR—System Components

Function	Device	Source	Line	Function	Device	Source	Line	Function	Device	Source	Line	
This section presents the major microprocessor system devices organized into system groups, ie 6800, 8080, 68000, etc. It includes those RAM's, ROM's and PROM's which are unique to a system. It omits most general purpose memories as they are listed in the Memory section. Similarly, buffers, line drivers, transceivers, UART's, etc. are covered briefly here as they are presented in depth in the Digital and Interface sections.								Decoder/Demultiplexer AM2924C AMD

MICROPROCESSOR—System Components (Cont'd)

Function	Device	Source	Line	Function	Device	Source	Line	Function	Device	Source	Line
16 Bit				32000							
(Cont'd)											
80286											
Microprocessor, 16-Bit	SAB80286	Siemens		SCSI Interface Controller	CA53C80	*† Calmos	35	Microprocessor, 8-Bit	TI32008	TI	
Asynchronous Communications Element	CA82C50A	Calmos		Serial Communications Controller	CA85C30	Calmos		Microprocessor, 16-Bit	TI32016	TI	65
Bus Arbiter (synchronizes 80286 with Multi-Master bus.)	82289	Intel		Serial Controller Interface	CA82C52	Calmos		Microprocessor, 32-Bit	TI32032	TI	
Bus Controller	CA82C88	*† Calmos		SBP9989				Microprocessor, 32-Bit, CMOS, with 16-Bit External Data Bus	NS32C016	National	
	UC82C288	* Unicorn		Microprocessor	SBP9989	† TI		Microprocessor, 32-Bit, CMOS, with 32-Bit External Data Bus	NS32C032	National	
	VL82C288	VLSI Tech	5	Interrupt Control Circuit	SBP9966	† TI		Microprocessor, 32-Bit, with Virtual M	NS32332	National	
Clock Driver and Ready Interface (for iAPX 286 processors)	82284	AMD		Programmable System Interface	SPB9901	† TI	40	Microprocessor, 32-Bit, with 32-Bit External Data Bus	NS32032	National	70
Clock Generator and Driver	CA82C84A	*† Calmos		TMS380					NS32132	National	
	VL82C284	VLSI Tech		Token-Ring LAN Communications Processor (Part of TMS380 Chip Set)	TMS38010	TI		Microprocessor, 32-Bit, with 8-Bit External Data Bus	NS32008	National	
Clock Generator and Ready Interface	82C284-10	Intel	10	Token-Ring LAN Protocol Handler (Part of TMS380 Chip Set)	TMS38020	TI		Arithmetic, Floating Point, Advanced	NS32310	National	
	82C284-12	Intel		Token-Ring LAN Ring Interface Controller (Part of TMS380 Chip Set)	TMS38052	TI		Arithmetic, Floating Point Processor	NS32081	National	
	82C284-6	Intel		Token-Ring LAN Ring Interface Transceiver (Part of TMS380 Chip Set)	TMS38051	TI		DMA Controller	NS32203	National	75
	82C284-8	Intel		Token-Ring LAN System Interface (Part of TMS380 Chip Set)	TMS38030	TI	15	Floating Point Unit	NS32081-10	National	
Clock Generator/Driver	UC82C284	* Unicorn		Transputer					NS32081-15	National	
DMA Controller	UC82C37A	* Unicorn		Microprocessor with External Memory Interface	IMST212	Inmos			NS32081-6	National	
DMA Coprocessor	SAB82257	Siemens			IMST222	Inmos (2782)			TI32081	TI	
	SAB82257-6	Siemens		Microprocessor, 10 or 20 Mb/s Serial Links, 2 Kbytes RAM	T212A	Inmos		Floating Point Unit (15 MHz)	NS32381-15	National	80
	SAB82258-1	Siemens		Disk Processor	IMSM212	Inmos (2785)		Floating Point Unit (16 or 32-bit slave protocol support)	NS32381	National	
IBM PC/AT Compatible Chip Set (replaces major logic functions of all microprocessor peripherals)	POACH/AT	ZyMOS		Link Adapter, 10 or 20 Mb/s	IMSC011	Inmos (2781)		Floating Point Unit (20 MHz)	NS32381-20	National	
IBM PC/AT Compatible Chip Set (replaces most address and data buffers on the AT motherboard)	POACH/ATB	ZyMOS	20		IMSC012	Inmos (2781)		Interrupt Control Unit	NS32202	National	
IBM PC/AT Compatible Chip Set (replaces the major logic functions of the AT motherboard)	POACH/ATF	ZyMOS		Z8000					TI32202	TI	
Matrix-Vector Multiplier Module (for 256-column matrices)	64K8-ICMM	Oxford (2998)		Bus Monitor	MD68SC49B	Mitel		Memory Management Unit	NS32082	National	85
Multibus II Message Passing Coprocessor for 80186/80286/80386 and 6800	VL82C389	VLSI Tech (3377)		Clock Generator and Controller	VL86C81	VLSI Tech			NS32382	National	
PC/AT Address Buffer (part of IBM PC/AT chipset)	VL82C103	VLSI Tech		Counter/Timer, Parallel I/O	Z8536-CIO	◊ Zilog			NS32382-10	National	
PC/AT Data Buffer (part of IBM PC/AT chipset)	VL82C104	VLSI Tech	25	DMA Transfer Controller	Z8516-DTC	Zilog			NS32382-15	National	
PC/AT Memory Controller (part of IBM PC/AT chipset)	VL82C102	VLSI Tech		FIFO Buffer Unit (128x8)	Z8060	Zilog		Serial Communications Controller	CA85C30	Calmos	90
PC/AT Peripheral Controller (part of IBM PC/AT chipset)	VL82C100	VLSI Tech		General Logic Unit (Interfaces the Z80 to a system environment)	Z80C20-Z-GLU	Zilog		Timing Control Unit	NS32C201	National	
PC/AT System Controller (part of IBM PC/AT chipset)	VL82C101	VLSI Tech		Output Interface Unit (with 128 byte FIFO Unit)	Z8038	◊ Zilog			NS32201	National	
Priority Interrupt Controller	UC82C59A	* Unicorn		SCSI Interface Chip	Z5380-SCSI	Zilog			NS32301	National	
Programmable DMA Controller	CA82C37A	*† Calmos	30	Serial Communications Controller	Z80C30Z-SCC	Zilog	60		TI32201	TI	
Programmable Interrupt Controller	CA82C59A	*† Calmos		Serial Controller Multi-Protocol	Z8530-SCC	◊ Zilog		32 Bit			
Programmable Interval Timer	CA82C54	*† Calmos		16/32 Bit				Microprocessor	WE32200	AT&T	95
Programmable Peripheral Interface	CA82C55A	*† Calmos		16000				DMA Controller	WE32204	AT&T (2538)	
Real-Time Clock/Calendar	CA01C50	*† Calmos		Microprocessor, 32-Bit	F32032	National		Math Acceleration Unit	WE32206	AT&T	
				LAN Coax Receiver Interface	DP8392	National		Memory Management Unit	WE32201	AT&T

INTRODUCTION TO INTERFACE

In the Interface Section the selection parameters differ for each category; therefore each has its own format. Some of the products in this section, primarily analog to digital and digital to analog converters, may be hybrids; the hybrids listed are only those packaged to be compatible with ICs.

In addition to these circuits are devices used to interface to peripherals such as: display drivers, keyboard encoder-decoders, line circuits, and transmitter-receiver circuits.

IC MASTER

BELONGS ON YOUR BOOKSHELF

If you don't have your own IC MASTER, you can obtain your own copy by ordering now. Write for your own copy or order by telephone as described below.

IC MASTER is a two-volume set of technical data carefully organized to direct the engineer to the integrated circuits and related products that are closest to his specific needs. It is the surest and fastest way to find the optimum devices to answer an engineering design requirement. By ordering now, you won't have to borrow or search for IC MASTER the next time you need it.

Typical Use of IC MASTER

Can an engineer find out who makes a 256K dynamic RAM with an access time of 120 nanoseconds or faster in less than 30 seconds? He can if he turns to the Memory section of IC MASTER and looks for the 256K organization (words and bits per word) that he needs. Because each device is listed in order of access time, he can easily determine the devices that satisfy his speed requirements.

In the United States only:

You can order IC Master simply by charging it to your VISA or Master Card credit card. To place your order (USA only) call now: (516) 227-1300 or (408) 249-6800.

Or mail your order to

IC MASTER

INTRODUCTION TO LINEAR

The Linear Section includes parameters on over 1100 operational amplifiers. Since there are so many devices, separate lists are provided for those having special characteristics such as High Speed, High Voltage or Wide Bandwidth. If you have located an op amp in a specialized category, you can review its characteristics by finding it in the Part Number or Product Indexes and looking it up in the Operational Amplifier Characteristics Section.

After the special lists, the "Operational Amplifier Characteristics" listings categorize amplifiers by input parameters. They are arranged in order of increasing offset voltage, bias current, offset current and then voltage drift. The column labeled "Comp" indicates the number of external components normally used for compensation; for example "0" means no compensation is required.

Consumer circuits such as audio amplifiers, AM, FM, and TV circuits as well as some digital devices (watches, calculators, etc.) are covered by model number in the Consumer Circuit Section. Linear devices that do not fit in conventional categories are listed under the heading "Other Linear Devices"

TA7504 Toshiba				2000@22 LH0101 Maxim				60@30 PA80J Apex (2480)			
FET Input. The "741" of the FET input devices has yet to be established. Such a device requires very low cost, several sources, and many users. Commercial devices in the 155 series above meet some of these criteria, however, devices from the series below are generally lower in cost.				LH0101A $\uparrow$ Maxim				50@10 AD380S $\uparrow$ AD (2428, 2462)			
CA3140 $\uparrow$ GE/RCA (2647, 2657)				LH0101AC Maxim				AD382S $\uparrow$ AD (2428, 2462)			
CA3160 $\uparrow$ GE/RCA (2647)				LH0101C Maxim				9918 OEI

IC MASTER BELONGS ON YOUR BOOKSHELF

If you don't have your own IC MASTER, you can obtain your own copy by ordering now. Write for your own copy or order by telephone as described below.

IC MASTER is a three-volume set of technical data carefully organized to direct the engineer to the integrated circuits and related products that are closest to his specific needs. It is the surest and fastest way to find the optimum devices to answer an engineering design requirement. By ordering now, you won't have to borrow or search for IC MASTER the next time you need it.

Typical Use of IC MASTER

Can an engineer find out who makes a 256K dynamic RAM with an access time of 120 nanoseconds or faster in less than 30 seconds? He can if he turns to the Memory section of IC MASTER and looks for the 256K organization (words and bits per word) that he needs. Because each device is listed in order of access time, he can easily determine the devices that satisfy his speed requirements.

It's Easy to Order:

You can order IC Master simply by charging it to your Visa or Master Card credit card. To place your order call now: (516) 227-1300.

Or mail your purchase order to:

IC MASTER

Hearst Business Communications, Inc.

645 Stewart Avenue

Garden City, NY 11530

ORDER YOUR COPY NOW

INTRODUCTION TO MEMORY

The Memory Section provides initial selection information and data on E²PROMs, RAMs, and ROMs as well as other memory devices. In these particular sections, the devices are characterized by organization (words and bits/word) and by access times. In order to assure that the access times are comparable, whenever possible the times are shown in nanoseconds over the full rated temperature range for the devices (i.e., 0° to 70°C for commercial units and -55°C to 125°C for military units). The full temperature nanosecond value is marked "nsF". When this value isn't specified, the guaranteed nanosecond value at room temperature is listed followed by "nsR". "Typical" values are invariably much faster than the guaranteed ones so that such listings place these memories higher on the list than they otherwise would appear.

ALL NEW with this edition of EEM **GET ORGANIZED!**

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M"

for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for \$25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add \$2.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 Stewart Ave., Garden City, NY 11530

When you must have older bipolar military ICs, remember Lansdale: we serve the semiconductor aftermarket. Our products are those that others no longer make, assuring you that you'll always have a source.

You'll see many old friends on our product list. Like Harris' 0512 Bipolar Prom, Signetics DTL and TTL. Motorola's SUHL-TTL and others. And we can meet all your needs, even to the most exacting military standards.

We also do custom manufacturing, including Schottky TTL, linear and digital. And we can give you gold-doping where needed.

So don't go to the expense of designing-in a new part. Not when we still mak'em.

Exactly like they used to.

ALTERNATE SOURCE DIRECTORY

The Alternate Source Directory is an industry-wide cross reference of devices that manufacturers claim are pin-for-pin and functional equivalents to IC's made by other firms. It contains over 113,000 cross references.

The second column of this Alternate Source Directory shows devices that are replacements for those in the first column. Devices listed in **BOLD FACE** type have technical data in the Master Selection Guides. This information begins on the page listed to the right of the **BOLD FACE** part numbers. Products preceded by a ♦ have been discontinued by the manufacturer. This section does include discontinued devices that are not listed in the Master Selection Guides; in order to maintain this list within some reasonable bounds, the A and B suffixes indicating improved versions generally have been dropped.

One of the difficulties with any cross reference is that devices meant to be alternates do not necessarily perform the same in all circuits. Thus, it will be necessary for you to check specifications, or even check circuit performance before deciding which alternates are right for you. But if you do not find the devices you need here, it may be possible to find additional alternates by locating the device in the Master Selection Guides. Particularly for digital circuits, the other products grouped with it will normally offer similar or identical performance.

• Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

• Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

* Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

ALL COURSE DIRECTORY

◆ Discontinued The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

The manufacturers report their devices can be used as direct replacements. Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements. Performance details often differ, so compare the specifications considering your requirements.

• Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements. Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements. Performance details often differ, so compare the specifications considering your requirements.

• Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

• Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

• Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

• Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

• Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

ALT. SOURCE DIRECTORY

• Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

• Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

Bold face device numbers indicate manufacturers data is provided in the IC Master on the Pages noted.

• Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

• Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements. Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.
